

COSC 414 Project 2 Screen Captures

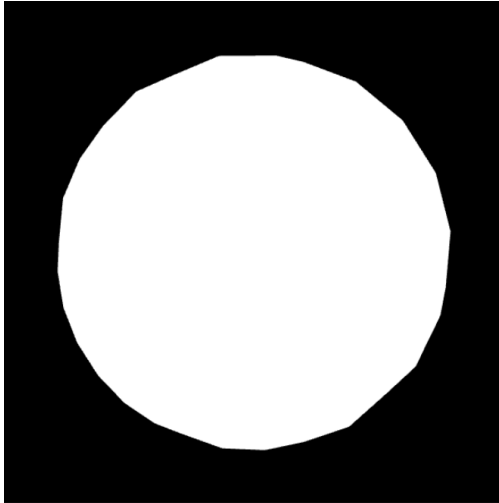

Group 18

Members:

Joonsik Kim

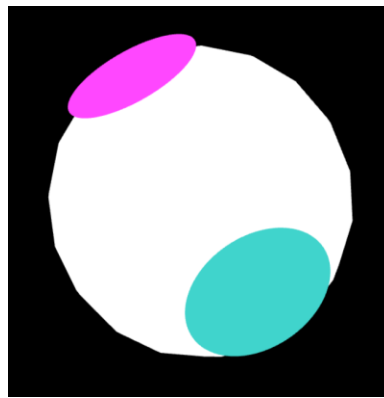

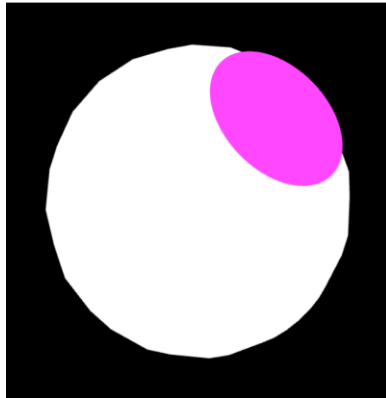

Mackenzie Atkins

Michael Turner

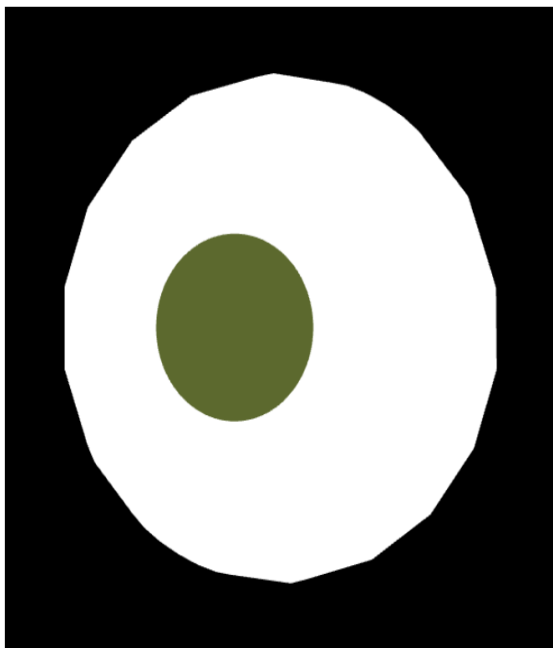

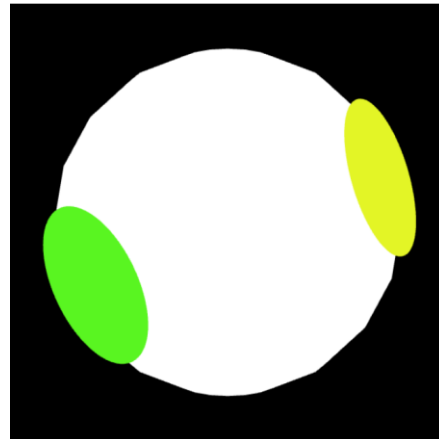

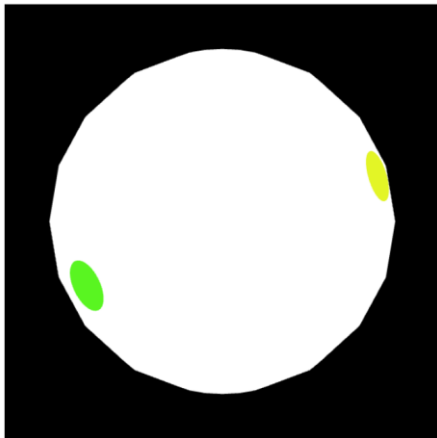

The game starts with a blank white sphere set on a black background.

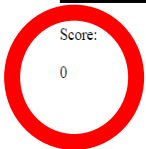

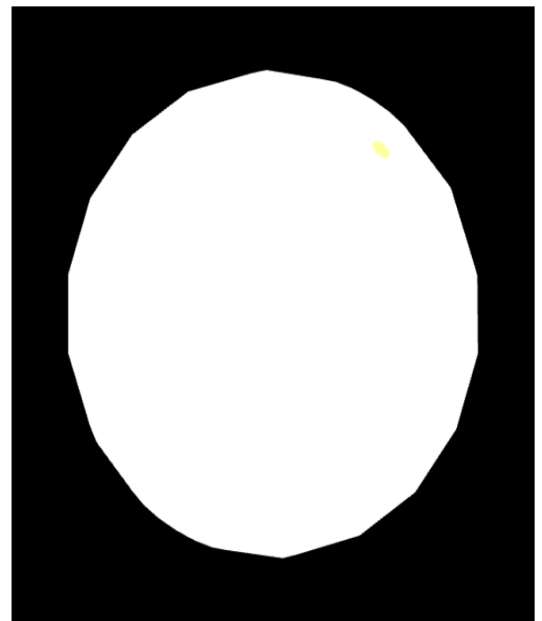

Using the mouse you can rotate the sphere in any direction.

Up to 10 bacteria appear as random colors and start at random points and grow uniformly from the point that they start from.

Clicking on a bacteria destroys it instantly and awards points based on how quickly you click on it.

After destroying all the bacteria you receive a prompt indicating that you've won.

Score:

73.00

You Win!
